PRIMEX 22 CAMERAS	CAMERA MOUNTS	CALIBRATION WANDS	CALIBRATION SQUARES

Proven in sustained, operationally demanding professional use and fully operational when decommissioned.

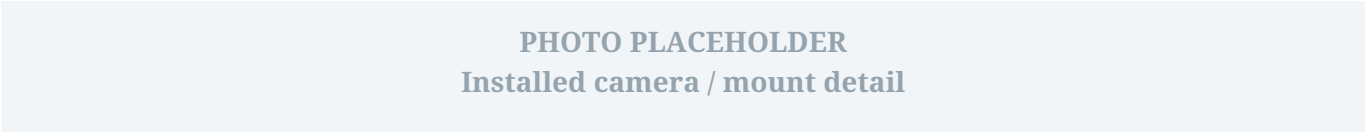

Opportunity Overview

This offering provides a rare opportunity to acquire a complete, large-scale optical motion capture system centered on 58 OptiTrack PrimeX 22 cameras. The camera array is paired with its associated mounting, calibration, active tracking, network switching, license-key, cabling, and transport infrastructure.

The system performed very well over an extended service life in an environment where dependable tracking continuity and precision were operationally important. It was fully functional when removed from service and is being documented for sale as one cohesive package.

Why the Package Is Valuable

- Immediate budget clarity: the complete package is offered at \$189,900 OBO.
- Avoids sourcing and compatibility risk across dozens of separate cameras and accessories.
- Preserves the matched infrastructure used to support a professional multi-camera volume.
- Suitable for a new installation or a major expansion of an existing OptiTrack deployment.
- Buyer diligence, verification, packing, and logistics can be coordinated as one transaction.

Potential Applications

Motion Capture & Animation	Virtual Production	Location-Based XR / VR
Robotics & Autonomy	Biomechanics & Movement Science	Sports Performance
Simulation & Training	Academic Research	Industrial Tracking

Included Equipment

Component	Quantity	Notes
OptiTrack PrimeX 22 cameras	58	Core camera array
Camera mounts	58	One mount per camera
Calibration wands	4	Calibration equipment
Calibration squares	2	Ground-plane / calibration equipment
USB hardware/security license keys	3	Exact products, versions, and transfer process to be verified
OptiTrack active base stations	4	Active tracking infrastructure
PoE+ network switches	Complete set	Sufficient to support the full array; models/counts forthcoming
Ethernet / PoE cabling	Complete set	Cabling for every camera; lengths/counts forthcoming
Pelican transport / storage cases	Included	Final case count and packing manifest forthcoming

The final diligence schedule will include serial numbers, lens/filter configuration, switch models and port counts, cable lengths, Pelican case quantities, condition notes, photographs, and functional evidence.

PrimeX 22 Technical Profile

The PrimeX 22 is a high-speed, low-latency GigE optical tracking camera designed for demanding professional tracking volumes.

Specification	PrimeX 22
Resolution	2048 x 1088
Native frame rate	360 Hz
Published latency	2.8 ms
Published 3D accuracy	+/- 0.2 mm
Published active range	30 m / 98 ft
Published passive range	21 m / 69 ft
Data connection	GigE
Power	PoE+
Stock lens	C-mount 6.8 mm f/1.6
Field of view	79 deg x 49 deg

Published specifications are provided for buyer orientation and should be independently confirmed against the exact lens/filter configuration and current manufacturer documentation.

Scale and Replacement Context

At OptiTrack's published \$3,999 starting price at the time of this draft, 58 new PrimeX 22 cameras alone represent approximately \$231,942 before mounts, calibration tools, active base stations, switches, cabling, cases, and license hardware. The complete used package is offered at \$189,900 OBO.

Condition and Buyer Diligence

- Long-term professional service history.
- Proven in an operationally demanding environment.
- System performed very well throughout its service life.
- Fully operational when decommissioned.
- Normal cosmetic signs of professional installation and removal may be present and will be shown accurately.
- Equipment is being organized, inspected, photographed, and cataloged for buyer review.

Available to Qualified Buyers

- Detailed inventory and serial-number schedule.
- Condition photographs and lens/housing close-ups.
- Switch models, port counts, cable lengths, and packing manifest.
- Confirmed license-key product, version, maintenance, and transfer information.
- Remote functional verification, in-person inspection, or third-party inspection by arrangement.
- Pickup and freight planning based on buyer location.

Transaction Structure

- Asking price: \$189,900 OBO for the complete package.
- Complete-system buyers receive priority before any consideration of smaller lots.
- Reasonable offers will be evaluated based on price, payment certainty, inspection requirements, and logistics.
- Freight, taxes, duties, installation, and commissioning are excluded unless expressly included in the final agreement.
- Final sale documentation will define inspection, payment, title transfer, risk of loss, and equipment condition.
